

## Quarter Project

### Everyday Chemicals Around You

For this project you will be required to construct a visual display about various chemicals that are found in everyday products that you use. The more creative you are the better. It must contain the following:

- 15 different chemicals, each one from a different product (no repeats)
- The product's label and list of ingredients (real, drawn, or computerized)
- The name of each chemical
- The formula and/or structure of each chemical
- What this chemical does for the product
- Pictures, color, theme, creativity

For your presentation, you will need to discuss two of the most interesting chemicals and explain your display method (theme). **Your presentation should be no more than 3 minutes in length.** You need to be ready on your presentation day, or you will receive 2 letter grades lower.
