$$8x - 3x + 2 - x = \square x + \square$$

Exemplar: (shown at right)
Other correct solutions are possible.

Rubric: (1 point) Student creates an equation with no solutions.

- Other correct responses:
- Any equation with a slope of 4 and an intercept that is not 2.

$$8x - 3x + 2 - x = \boxed{4}x + \boxed{8}$$
