

Adding Integers on a Number Line

Solve 3+-5= using a number line. **Example:**

$$3 + -5 = -2$$

1. Solve -2+1= using a number line.

$$-2+1=$$

2. Solve 3+-1= using a number line.

3. Solve 4+-6= using a number line.

4. Solve 3+-3= using a number line.

$$3+-3=$$

5. Solve -8+4= using a number line.

$$-8+4=$$

6. Solve 9+-5= using a number line.

$$9 + -5 =$$

Name	Period	Date	RP
When adding integers with diand sometimes the sum is 0.	ifferent signs, sometimes	the sum is positive	e, sometimes the sum is negative
Explain when a sum of two n	umbers would be positive	2.	
Explain when a sum of two n	umbers would be negativ	e.	
Explain when a sum of two n	umbers would be 0.
