

INTRODUCTION TO THE NEVADA EDUCATOR PERFORMANCE FRAMEWORK INSTRUCTIONAL PLANNING DOCUMENTS

The purpose of these resources is to begin to plan instruction intentionally with the NEPF Standards in mind.

The first resource is the **Lesson Plan Guide** that allows teachers/teams to review each of the Standards in line with their topic/unit of instruction. Teachers/teams may wish to choose only one Indicator from one Standard at a time to zero in on during planning. Some teams may be developing a full unit of study and would like to address all of the Standards and Indicators. Time allocation will determine the depth to which teachers/teams work with the Lesson Planning supports.

The second resource is the **Standards Based Planning Guide** that provides a full development of each of the NEPF High Leverage Instructional Standards and Indicators and the considerations teachers/teams should review when planning for instruction and assessment. Suggestions and options are included for how to utilize this document in a series of focused workshops for teachers. It is important that teachers experience the critical questions which frame what they will expect students to know and be able to do as well as what they will do to ensure students are successful.
