## Pre-Algebra: Functions #2

Write the definitions:

1. Relation –
2. Function –
3. Domain - Range -

---

4. Which letter **cannot** repeat if the relation is a function? **x or y** (Circle one)

---

5. Identify the Domain, Range:

$(-2, 5), (-1, 2), (0, 4), (1, -9)$

Domain:

Range:

Which values are independent? **domain** or **range** (Circle the correct answer)

2. Function –
3. Domain - Range -

---

4. Which letter **cannot** repeat if the relation is a function? **x or y** (Circle one)

---

5. Identify the Domain, Range:

$(-2, 5), (-1, 2), (0, 4), (1, -9)$

Domain:

Range:

Which values are independent? **domain** or **range** (Circle the correct answer)

6. Represent the following relation as a graph and a mapping diagram to tell whether it is a function:

- a.  $(0, 3), (3, 3), (-4, -2), (-1, -2), (2, -2)$       b.  $(-3, 4), (3, 1), (-1, -2), (3, -2), (-2, 0)$

Function? Yes or No (Circle one)

Function? Yes or No (Circle one)

7. Which relation is NOT a function below? \_\_\_\_\_

C.  $\{(-3, 6), (-7, 2), (-4, 6), (-1, 5)\}$

D. 

x	-2	0	2	4
y	-1	-1	-1	-1

6. Represent the following relation as a graph and a mapping diagram to tell whether it is a function:

- b.  $(0, 3), (3, 3), (-4, -2), (-1, -2), (2, -2)$       b.  $(-3, 4), (3, 1), (-1, -2), (3, -2), (-2, 0)$

Function? Yes or No (Circle one)

Function? Yes or No (Circle one)

Which relation is NOT a function below? \_\_\_\_\_

C.  $\{(-3, 6), (-7, 2), (-4, 6), (-1, 5)\}$

D. 

x	-2	0	2	4
y	-1	-1	-1	-1
