

Percent Problems – Finding the Percent

Examples:

What % of 48 is 12?

$$\frac{x}{100} = \frac{12}{48}$$

$\times 25$ (over 12 and 48)
 $\times 25$ (under 12 and 48)
 $x = 25\%$

What % of 99 is 9?

$$\frac{x}{100} = \frac{9}{99}$$

$\times 10$ (over 9 and 99)
 $\times 10$ (under 9 and 99)
 $x = 10\%$

- | | | |
|-------------------------|-------------------------|-------------------------|
| 1. What % of 28 is 7? | 2. What % of 60 is 12? | 3. What % of 90 is 45? |
| 4. What % of 25 is 15? | 5. What % of 20 is 2? | 6. What % of 45 is 36? |
| 7. What % of 120 is 30? | 8. What % of 70 is 35? | 9. What % of 6 is 6? |
| 10. What % of 32 is 24? | 11. What % of 80 is 12? | 12. What % 40 is 16? |
| 13. What % of 12 is 9? | 14. What % of 55 is 11? | 15. What % of 45 is 36? |
